

PAX 2026: CONCOURSE STAND GUIDELINES

- All **stand plans and build schedules** need to follow the standard custom stand guidelines and will need to be submitted through the [PAX 2026 Stand Declaration Form](#) for RX and MCEC approval before 31st July 2026.
 - All materials will need to be prefabricated before arriving onsite as no construction, or use of power tools are permitted on the concourse. Please consider these guidelines with your installation plans.
- **Queuing & Stand Management:** your account manager would have shared with you the queuing footprint allocated for your stand. This is for strictly queuing only. A queuing path will be marked on the floor prior to show open. From this point forward it will be the responsibility of the exhibitor to manage the queue within the allocated space. If you are having any activations or holding giveaways on your stand, please let us know [here](#).
- **Build & Access Times:** Access is from Tuesday 6th October from 7pm. RXA Operations will be in contact to discuss this further so we can manage this as part of our overall move-in schedule. As the concourse is a public thoroughfare, **build & dismantle times are STRICTLY from 7pm – 7am.**
 - **Move-out: Sunday 11th October 7pm – Monday 12th October 7am**
- **Security:** Please note – as the concourse is a public thoroughfare, it will only be patrolled by roving event security between the following hours – 19:00 – 08:00 Friday - Monday, however there is 24-hour venue CCTV monitoring in place. Should you wish to organise dedicated security for asset protection, this can be arranged through our Event Security team: melody@secureevent.net
- **For any further questions, please contact** lara.hearfield@rxglobal.com
